Art Unit: 2512

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I. Claims 1-9 and 17-19, drawn to a p.c. data card comprised of plural layers and the method for affixing plural such layers onto a data card, all classified in Class 360, subclass 131.

Group II. Claims 10-16, 20-27 and 28-30 drawn to an adapter for receiving a data card for insertion into a floppy disk drive, classified in Class 360, subclass 55.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations. (M.P.E.P. § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed as the combination does not call for nor require the first-third or fourth-fifth layers of the p.c. data card of group I. The subcombination has separate utility such as in an environment distinct from the

outer shell and/or the floppy disk environment set forth in invention II.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, divergent search and recognized contrastable subject matter restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Edell on August 27, 1996 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John H. Wolff whose telephone number is (703) 308-3215.
